Freelance Cloud Builder

Designing and operating open-source virtualization platforms
with a strong focus on **XCP-ng / Xen Orchestra**,
resilient datacenter architectures
and **automation-driven operations**.

Profile

IT professional with a strong hands-on background in **datacenter operations**,
open-source virtualization, **network architecture** and **Linux systems**.

Over the past years, I have specialized in the design, migration and operation of
XCP-ng / Xen Orchestra infrastructures, supporting organizations through
complex **VMware and XenServer exit strategies**, including multi-datacenter setups.

Pragmatic, field-oriented mindset with a strong focus on **reliability**,
simplicity, **automation** and **operational efficiency**.

Professional Experience

February 2026 - Present

Disruptive Minds - Co-Founder & Technical Lead

Luxembourg

Co-founder and technical lead of an IT infrastructure services company focused on open-source virtualization.

- Design and delivery of XCP-ng / Xen Orchestra platforms
- VMware to XCP-ng migration projects (single and multi-datacenter)
- Design of resilient, automated and cost-efficient infrastructures
- Definition and enforcement of technical and operational standards
- Hands-on involvement in complex migrations and production environments

February 2023 - February 2026

Independent Infrastructure & Virtualization Consultant

Paris

Independent consulting activity focused on datacenter operations, open-source virtualization and infrastructure architecture.

- Design, audit and implementation of XCP-ng / Xen Orchestra infrastructures
- Migration projects from XenServer and VMware to XCP-ng
- Deployment and administration of XCP-ng pools, including user training
- Infrastructure audits (XCP-ng, Proxmox, network) and remediation
- Linux systems administration (Debian, Docker-based workloads)
- Network architecture design across up to three datacenters (BGP, OSPF)
- Datacenter operations: hardware selection, installation and maintenance
- Disaster Recovery and Business Continuity design and implementation
- On-call duties, production support and incident response
- Infrastructure automation (Packer, Terraform, Ansible, Bash)
- Contributions to open-source projects in the XCP-ng ecosystem
- Hardware and software R&D around XCP-ng platforms

August 2020 - January 2023

Aqua Ray – Systems, Network & Datacenter Specialist
Paris

Hands-on infrastructure role combining datacenter operations, network design and early production implementations of open-source virtualization.

- Network design and implementation (BGP, OSPF, MPLS-LDP)
- Deployment and operation of XCP-ng / Xen Orchestra platforms
- Linux systems administration (LAMP stacks, HAProxy)
- Disaster Recovery and Business Continuity planning (PRA)
- Datacenter migration operations
- Infrastructure automation and tooling (Ansible, Bash)
- User and production support

August 2018 - July 2020

RTE - Réseau de Transport d'Électricité – Regional IT Operations Support
Aix-en-Provence

Support role within a large-scale, mission-critical public infrastructure.

- Management of regional IT asset inventory and workstation fleet
 - Level 1 user support and incident coordination
 - Liaison with external managed service providers
 - Administration and evolution of SharePoint platforms (2010 & 2013)
 - User training, documentation and process support
-

Education

- **Administrateur Système et Réseau**
AFORP – Pôle Formation UIMM Île-de-France (2021 – 2023)
 - **BTS SIO – SISR**
Pôle Formation des Industries Technologiques du Vaucluse (2018 – 2020)
 - **Bac STI2D – option SIN**
La Salle Avignon (2015 – 2018)
-

Certifications

- MOOC l'Atelier RGPD
 - IPv6 Certification
 - SecNum Académie
 - Objectif IPv6
-

Languages

- French: Native or bilingual
- English: Professional working proficiency
- German: Elementary
